

REDLINE 5

The five function level at the three function price!

The last thing you need is an inspector telling you to reset a line because the slope is incorrect. Now... ASP makes it easier than ever to get the exact slope you need the first time.

The answer is the new REDLINE 5. With its patented features, the REDLINE 5 gives you accurate reading 5 ways:

- 1% slope
- 2% slope
- Vertical
- Horizontal
- 45 Degrees

Stay Out of the Red!

REDLINE 5 is so inexpensive, you can get one for every member on your crew.

And its uses are unlimited —

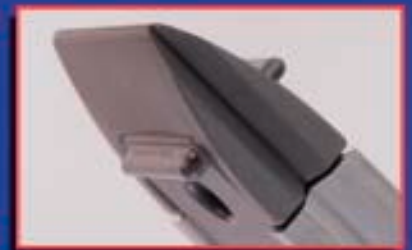

- Commercial foundations
- Shower pan sub base
- General contractors
- Exterior walkways
- Storm piping
- DWV lines
- Plumbing
- Home projects
- Concrete work
- Gutters
- Pools, etc.

P/N 9250

Your level utilizes 2 sides...
The REDLINE 5 Utilizes 4 Sides

The magnetic edge is used for steel studs and 1000 other uses

1/4" Shown on one side
1/8" on the other

Calibrated lifts to show code required slopes

The Red Line is a patented REDLINE feature

The window for the 45° vial is also 45° for quicker identification

For a very small investment, you can avoid big problems. Order your REDLINE 5 NOW and make your life easier and more profitable.

No longer do you have to guess whether your pipe is set on a 1% or 2% slope. REDLINE 5 tells you exactly! Get the Slope – Right – From the Start!
